

Acudish Lemon, Citrus, Grapefruit

Acutrade **AcuDish Lemon, Citrus or Grapefruit** dishwash liquid is a very powerful blend of bio-degradable concentrate of liquid grease cutting surfactants and agents, containing a neutral pH that is soft on the hands and suits all skin types, while being harsh on the grease stripping from your dishes. **AcuDish Lemon, Citrus or Grapefruit** is non-caustic, non-volatile and non-corrosive.

AcuDish Lemon, Citrus or Grapefruit is a leader in its class when it comes to cleaning dishes.

AcuDish Lemon, Citrus or Grapefruit is a very high performance but extremely economic grease cutting detergent which only needs one or two squirts of product to enable the washing of a whole sink full of dirty dishes and cutlery. AcuDisk Green dishwashing liquid has advanced foaming agents which do not break as grease conforms to the principle that plenty of foam will indicate the inherent availability of cleaning agent in the sink and some foam still remains even when washing up is over. A challenge with lesser detergents is that the foam breaks before the wash is complete, meaning wasted extra product needs to be added.

Uses: AcuDisk Lemon, Citrus or Grapefruit liquid is primarily meant to be used as a dishwashing agent and it performs flawlessly at a very cost effective price. It can also confidently be used for all cleaning applications where a neutral detergent is required.

Environmental information:

AcuDish Lemon, Citrus or Grapefruit liquid uses readily biodegradable ingredients that does not cause harm to the environment when being discharged into the drains or septic tanks.

Quality Product Guarantee:

AcuDish Lemon, Citrus or Grapefruit is formulated from the best quality ingredients ensuring you the best quality product in your bottle of dishwash.
